Says That the Turks Will Not Attack Volo.

London, April 26.-The Times today publishes a dispatch from Athens dated Saturday night, giving an account of an interview with the Greek premier, Delyannis. The latter is quoted as government had received any information that day from the Greek army in Thessaly beyond the announcements column, concerning which the greatest rittee. anxiety was felt, has reached Pharsalos safely, and, the premier added, 40,000 troops are now concentrated at Pharsalos, which is a place of consider able strength, the advisability of occupying it in case of retreat having long Great Sugar Refiner Passes been under consideration by the gov-

M. Delyannis sald there was needless larm regarding the safety of Volo, ding there was no reason to fear that the Turks would attempt to, occupy it. The success of the Greek troops in Epirus, he pointed out, was a counterpoise to the reverses in Thessaly, and, according to unofficial information, the Greeks expected to arrive at Janina on Saturday night.

The premier was convinced Athens would remain quiet; that the people had placed confidence in the king, and the government had assured the Times correspondent there was no reason to fear any disturbance. M. Delyannis, in splte of his age and severe anxieties, appeared to be in the best of health and Quincy, and passenger trains on that

Larissa Was Evacuated in the Greatest Haste and Disorder.

New York, April 26.—A dispatch to the Journal from London says: The special from Milouna, thus describes the fighting which led up to the battle: Early Chicago ... Friday morning Nischat Pasha's division occupied the hill of Kritiri. This was the last Greek position on the road to Larissa. The enemy was driven from it by Edhem Pasha's dexterous flank inovements. We had not to expend the lives of the Turkish soldiers in stormng it. The position was almost impregnable and was evacuated, thanks to Milwaukee our strategy. Friday the Turks took Kansas City to villages above and below the pass the right of the Greeks. There is more catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease, and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease, and therefore requires constitutional treatment. EVASIONS OF TAXATION.

The wail of the Minneapolis Journal over the "flagrant evasions of fair and equitable taxation" in St. Louis has been repeated because The Herald directed attention to the fact that the worst tax dodgers in the state live in Minneapolis and St. Paul and include the wholesale men, the milling corporations and the manufacturing firms of those cities. For years they have been cheating the state by making false valuations for the purposes of taxatlon, .02 and during all this time they have been detracting attention from the fraud by Louis county were paying but a fraction of the taxation which they should \$1.00 per year, 50 cents for six months, 25 cents justly bear. RUSSIAN PROTECTORATE. A Doubtful Story as to Turkey's Future. New York, April 26.-A dispatch to the

Journal from Berlin says: The Tageblatt announces that a definite agreement has been reached between Russia and Austria concerning Turkey. The terms of the agreement, it is said, are that the sultan shall renounce Crete, that the czar shall be giving a coaling station at Suda bay, in that island, and that in return Russia shall guarantee the integrity of Turkey. The advantage of this arrangement to the nations interested is obvious. Russia, in command of one of the most im-

MARCH TO THE ARMORY. In order to assure having the performers well in hand so that they could be sent on in proper order by Director Pearson, the boys were marshalled in the circulating room of The Herald, whence they marched to the Armory. To organize and set in motion a parade of The Herald newsboys requires the talent of a Napoleon, the patience of Job, a "good eye" and the voice of a fogsiren. A. C. Pearson, or "Pinky," as he is affectionately called by "his boys" when they are well out of range, combines these qualities in just the right proportions. He emerges triumphant from situations in which a lion-tamer er an elephant-breaker wouldn't be ir it. Under his direction the mob of 100 yelling "newsies" was reduced to order. with the aid of several able lieutenants from among the older boys, and promptly on time the march to the Armory began. The route was along Michigan street to Third avenue west, on Third avenue to Superior, east on Superior to Second avenue east and on the latter thoroughfare to the Armory. The parade was led by "The Herald Midgets," a military organization that would be of inestimable value to Greece in the present emergency, for its memhers are veterans who have stood shoulder to shoulder in victorious onslaughts on turkey at the Bethel on sundry and "Nanche" Oreckovsky, "Hennic"

M. J. Davis Retorts.

M. J. Davis, ex-president of the board of public works, characterizes as untrue the statement made by D. A. Reed, before the council last evening, to the effect that the former advised Contractor Fredrickson to push the work on the pumphouse last winter without Mr. Reed's knowledge and assent. The letter advising Mr. Fredrickson to push the work was written, Mr. Davis says, after consultation with all the them members of the board, including Mr. Reed. The weather was fine, and as the contractor seemed to be do-

ing nothing, Mr. Davis says, it was thought advisable to punch him up.

MIGHT PRODUCE REVENUE. A well-known ex-alderman sald to an Evening Herald reporter today that he hought the city garbage dumps might be made a source of revenue instead of expense. In other towns he said the garbage dumps are leased to persons who derive a good income from them by gathering articles found in the rubbish that have a commercial value. This cans are carefully saved, the tin melted from them and sold, while the iron sheets forming the cans are utilized fe scrap iron. There are many other articles that find their way to the dump 7½ that might be profitably saved.

THE GREATEST CLOTHING SALE OF THE 19th CENTURY.

Starts here Thursday Morning, April 29th, at 9 o'clock.

It is impossible to be fully prepared for this extraordinary sale before that hour. M. S. Which we place on sale Thursday morning. It is an acknowledged fact everywhere that Willoughby, Hill & Co. handled a finer line of goods than any other clothing store in America. This magnificent stock of

Men's Finest Suits, Spring and Top Coats, Boys' and Children's Clothing, Neckwear, Shirts, Hosiery, Underwear, Hats and Caps,

Is principally the work of the leading manufacturers of this country and Europe and are of the very finest quality and will be sold at prices never before quoted by any house in the country.

In addition to the Willoughby, Hill & Co. stock we have closed out from the J. P. Smith Shoe Co., Chicago, an enormous stock of Men's and Boys' Finest Shoes, all of which will be sold at unheard of prices.

Before these grand opportunities presented themselves, we had already purchased an immense regular spring stock and that must be sold, too. We've put prices on it that will make it sell.

Everything must go, we must get back our investment at once; we must realize—and quickly. It will pay you to travel a hundred miles to visit this great sale.

IMPORTANT NOTICE.—So that we may have ample room to handle the people who will attend this sale, all the stocks have been conveniently arranged for quick service. A large number of extra salesmen have also been semployed so that everyone will be promptly and the stocks have been conveniently are employed so that everyone will be promptly and the stocks have been conveniently are employed. employed so that everyone will be promptly waited on.

The Greatest Clothing Sale of the 19th Century

STARTS HERE TOMORROW morning at 9:30 o'clock. It is impossible to be fully prepared for this extraordinary sale before that hour.

Entire stock of Men's, Boys' and Children's Clothing, Furnishing Goods and Hats, which cost Willoughby, Hill & Co. \$154,000, and which I bought for \$97,000, is involved in this

Epoch-Making Sale.

The above advertisement speaks for itself. Mr. Griesheimer says above his own name that he alone bought the entire Willoughby, Hill & Co. stock. No mention has ever been made by the daily press of Chicago that Mr. Griesheimer was even joined by another in this purchase. That was left to the Duluth Fakir who again attempts to humbug you by false advertising.

From the action of the market at Chicago it was soon made evident that long wheat held loosely in large lots and especially that portion bought on the rising market of the week before had been sold out yesterday and Monday. It also became clear that many who had parted with their wheat had done so for prudential reasons and not from any change in their views regarding its ultimate worth in the market, and were re-establishing. IN THE NICK OF TIME.

Quick Thought, Strong Nerve, and De-termined Resolution on the Part of the Indians save Many a Life.

A Few Feet Only Between the Black Chasm of Death and the Unconscious Victim. The Indian's Knowledge of Nature and Nature's Laws Embodied in the Remedies which have Helped Him to Maintain for Centuries a Body That Lives for Years and Knows no Pain.

Where the white man to-day, in his ignorance and his inability to correctly interpret Nature would madly drive his horse over some yawning class that is invisible to the casual observer, the plunge into whose depths meaning instant death, the Indian would have felt its presence, for the Indian has ever been given a marvelous insight into the hidden secrets of Nature. She has shown to him her pitfalls mid has likewise RICHARDSON & DAY. taught him not only to avoid these, but has taught him her own secret ways of restoring health and prolonging life when her laws had been lisregarded by them, her children, Just as surely as the Indian would today use his strength and energy to save a white brother toppling

edies to-day are made in identically the same manner as they were made by the Indian ages ago. The Indians' instinct taught them to extract these medicines from the roots, herbs, barks and gums of the forest. This instinct was of more value than the greatest knowledge acquired from books by the most learned scholars. Generations of long and healthy lives have proved the wonderful effect of the Indians' medicines, and as we to-day have the privilege of bnying these same remedies, the same long life and health which characterize the Indian is ours for the asking. Kickapoo Indian Sagwa was ever and

still is, the greatest known blood purifier as well as . con a care for all afflictions of the stomach, the liver and the kidneys and all derangements resulting from a disordered condition of these organs. This, with the other remedies, you can procure of your druggist. They are recognized not only by hundreds who owe to the Kickapoo Indian Remedies their health, as being invaluable, but by druggists everywhere, as being the most important medicines which they are called upon to dispense. A well known druggist in this connection writes as follows: - "Preston, Minn., to the Kickapoo Indian Medicine Co., Gentlemen: - Mine is the oldest drug store in the county and I think sells more in St. Louis County, Minnesota, described goods than any other house in the county. I have a large sale of all your goods and they invariably give perfect satisfaction. I can most truthfully and honestly recommend them to the public. No medicine has ever been introduced here that holds its own as well as do the Kickapoo Indian Remedies. Yours truly, James B. Tibbetts." The above shows exactly the feeling of the men who handle these remedies. We have thousands of letters of gratitude from

Torturing Rheumatism

Is no respecter of persons—the healthy and vigorous are as liable to its attacks as the weak.

The symptoms of the disease are almost unnoticed at first, so insidiously do they steal over the body; gradually the little pains and stiffness increase, until they develop greater inconvenience day by day.

The knees, ankles and other joints of the body, ache constantly, swelling to several times their natural size; the patient finds himself unable to get around—is soon incapacitated for business, and later is confined to his bed, utterly helpless.

It is not generally known that the usual treatment for Rheumatism is decidedly injurious to the system. The doctor is able to relieve the first touch of the disease, but with the return of cold, disagreeable weather, the pains become sharper, and more constant, the bones ache more severely, and the disease gradually, but surely, possesses the entire body.

Rheumatism is a disease of the blood, for which all physicians prescribe potash, mercury and other mineral mixtures. The effect of these drugs is like adding fuel to the fire-hence the increasing severity of the disease.

The right remedy for Rheumatism is a real blood medicine—one which is more than a tonic, promptly reaching and curing deep-seated blood diseases. Swift's Specific (S. S. S.) is the only known cure for obstinate blood diseases, and is the only blood remedy guaranteed purely vegetable, containing not a

THE HOWLAND LOSSES.

New Bedford, Mass., April 28.—The first information of the losses of the three Howland corporations, with figures as the basis, is contained in a letter to creditors, which has just been issued. From this letter it appears that the total indebtedness will reach probably \$2,550,000, although it may fall siightly below this figure.

A SUICIDE IDENTIFIED.

Danville, Ili., April 28.—The man who committed suicide here last night by cutting his throat and then jumping into the river at the total indebtedness will reach probably \$2,550,000, although it may fall siightly below this figure.

She Charges Desertion.

Eliabeth A. McDonough this morning renewed her divorce proceedings against John McDonough. They are 30 and 40 years of age respectively, and they were married in Berry, Ont.. in June, 1887. The plaintiff alleges desertion dating from March, 1896. She also alleges that during three years he has wholly failed to support her and her children, not contributing to exceed \$20 during that time. John H. Brigham is her attorney.

When the omission was called to the attention of the officials of the elevator company, Mr. Moersch says, they pleaded ignorance of Moersch says, they pleaded ignorance of the law. While, of course, the assistant inspector says, such a plea does not exinspector says, such a plea does not excuse, he felt that in view of the fact that a settlement had been effected by the insurance company, no especial good would be attained by enforcing the penalty in this case. In future, however, he said, the department would not be so lenient. The law in question is found in section 9, chapter 7 of the general laws of 1893, and reads as follows: "Whenever there occurs in connection with any factory, mili, workshop, or any

public or private works in the state, any accident or injury to any individual producing death, or requiring the ald of a surgeon, it shall be the duty of the employer, superintendent or agent having charge of the work upon which, or in connection with which, the accident or injury, stating as fully as possible, the time or place, when or where said acci-dent or injury occurred, the names and residences of the person or persons killed or injured, and the place to which, if injured, the person or persons have been removed." The penalty provided in case of omission to comply with the law is a fine of not more than \$100 or imprison-Mr. Moersch says that the investiga-tions of his department in reference to the liability insurance carried by many time after the accident, by an agent of the insurance company and persuaded to

3 THE GREATEST ECLOTHING SALE OF THE 19th CENTURY.

Starts here Tomorrow Morning, April 29th, at 9 o'clock.

It is impossible to be fully prepared for this extraordinary sale before that hour. M. S. Burrows, ever watchful of the wind of trade and ready to capture every rich plum that falls from fashion's tree in order to place it at your very door at the slightest advance on the actual outlay, bought at tremendous sacrifice for spot cash the pick and choice of the entire stock of the

Which we place on sale Thursday morning. It is an acknowledged fact everywhere that Willoughby, Hill & Co. handled a finer line of goods than any other clothing store in America. This magnificent stock of

Men's Finest Suits, Spring and Top Coats, Boys' is and Children's Clothing, Neckwear, Shirts, Collars 3 and Cuffs, Hosiery, Underwear, Hats and Caps,

Is principally the work of the leading manufacturers of this country and Europe and are of the very finest quality and will be sold at prices never before quoted by any house in the country.

In addition to the Willoughby, Hill & Co. stock we have closed from the J. P. Smith Shoe Factory, Chicago, 800 pairs Men's and Boys' Fine Shoes, made up specially for A. I. Scott & Co., T. J. Hunt and J. G. Galloway & Co. All these shoes and boxes bear these Eastern shoe merchants' names. For some reason the goods were never delivered, and Mr. Burrows bought them off the floor in the factory at prices that will enable us to sell these new style Shoes at unheard of bargains.

Before these grand opportunities presented themselves, we had already purchased an immense regular spring stock and that must be sold, too. We've put prices on it that will make it sell.

Everything must go, we must get back our investment at once; we must realize—and quickly. It will pay you to travel a hundred miles to visit this great sale.

IMPORTANT NOTICE.—So that we may have ample room to handle the people who will attend this sale, all the stocks have been conveniently arranged for quick service. A large number of extra salesmen have also been employed so that everyone will be promptly waited on.

Reception Tonight from 7 till 10, during which time no goods will be on sale.

> Preparatory to commencing the erec tion of the steel, great structures of false work were built out from the cliffs on each side of the river to the point where the abutments are located. Then the work of placing the Iron was started on both sides of the river, and day after day the structure has grown toward the center until within a few days more the two sections will meet over midstream and the arch be sprung Great heavy railroad trains use the suspension bridge all the time the work is

The new arch is to be a wonder in its any bridge of its class in this country or Europe. It will have a span of about 550 feet between the end piers, and trussed span of 115 feet in length will connect it with the cliff on each side of the river. The main span is formed by an arch with horizontal upper chords At the skewbacks it will be hinged. Each truss has a batter of one horizontal to ten vertical. The width between the axes of the top chord is thirty feet, while between the axes of the rib at the erown the width will be 56 feet 7% inches. Above the centers of the skewbacks the axes of the upper chords will be 134 feet, while the axes of the ribs at the crown will be 114 feet above the skewbacks. On the American side the bed plates of the arch rest on abutments built on Clinton limestone half way between the water's edge and the top of the high bank. On the Canadian side the abutments rest on a concrete foundation built about half way up the slope. This new arch will have two floors or decks. On the upper floor will be laid the railroad tracks, while the lower deck will have ample room for a carriageway, sidewalks and trolley tracks. It is probable that the first trolley car to pass from the United States into the Dominion of Canada or its own wheels will cross this bridge, for one incentive to the construction of the arch is to afford trolley connection clal proceedings of the council, ordi between the two sides of the river in what will probably be a beit line service around a portion of the gorge. The Pennsylvania Steel company has the contract for building the arch, and so far they have made rapid beadway. far they have made rapid headway, dinances, in accordance with specimen considering the season of the year and the dangerous character of the work. In all the new bridge will contain 5,-560,000 pounds of steel plates and angles

in the form of columns, plate girders, braces, etc.; 218,000 pounds of steel castings, 182,143 pounds of steel eyebars and pins and 30,000 pounds of wrought iron rods and turnbuckles. In its completed state the arch is expected to earry on each track a load of two locomotives with four pair of drivers each and 40,-000 pounds on each pair, followed by a train of 3500 pounds per foot. In addition to this it is expected to support a live load of 3000 pounds per foot on the lower floor, making 10,000 pounds live load per foot in all, which will be an exceedingly heavy load.

It is intended to take the suspension bridge down carefully and rebuild it at another point on the gorge, perhaps Lewiston. However, it will be maintained in service until the new arch affords crossing facilities. Now the suspension bridge rests on the lower floor beams of the new arch, and the upper floor beams will be left out until the suspended structure of the present structure shall be raised sufficiently high to allow the beams to be placed under the upper chords of the suspen-sion bridge. While this is going on the

cables and towers of the suspension bridge may be taken down, and thus will disappear one of the oldest bridge landmarks on the Niagara frontier. CASTORIA

A CARD TO THE PUBLIC

It looked as if all Duluth was at The Great Eastern reception last night, and the unanimous verdict was that it was the grandest exhibition of the kind ever seen in this city. The store was at its best. The large stocks in all departments were perfectly arranged, and with the thousands of electric lights, it made a scene of brilliancy long to be remembered.

It was to be expected that my purchase of the Willoughby, Hill & Co. stock would excite the envy of some small dealers, and I notice it has. Small dogs often bark loud, but they don't bite, and these same merchants who are snarling at my enterprise would be satisfied to see Duluth go backward, not being endowed with that ability and aggressiveness so requisite in this Western country. I have never yet played the baby act, tried to do business on the sympathy racket or confidence game, but strictly on merit. Unfortunately I was not born in Duluth; neither have I been here sixteen years, yet in my stay of ten years from a very modest beginning I have built up a mercantile institution of which every citizen is proud. I have interested capitalists who have invested their money and given Duluth a store the like of which is not to be found in any other city of the same size in the world. I believe in Duluth and its future, and with it in mind, joined with Mr. Greisheimer, of Chicago, in the purchase of the Willoughby, Hill & Co. stock that I might give the citizens of Duluth better bargains in clothing than ever before, and that I am prepared to do so is shown by the tables loaded down with my share of the purchase. Thousands of the Willoughby, Hill & Co.'s Suits and Overcoats are here ready for your inspection.

Some people are evidently rattled; such deals as this Willoughby, Hill & Co.'s purchase have caused them to lose their nerve, and in their exasperation, have resorted to advertising methods that are disreputable; but I consider the source from which this attack comes and can only attribute it to a lack of business training and knowledge of the ethics that govern mercantile courtesies. Yours very truly,

alarmed at the rapid disappearance of the insects of the woods and fields. The Leicester Literary and Philosophical society has drawn up a series of regulations to protect the insects from the greed of collectors, and requires that no specimen of the wood white butterfly shall be taken, while of certain other species a collector may take but a single specimen during the season. Violations of the rules bring unpleasant penalties. A transgressor who is a member of the society may be expelled, he will be reported to any other society of which he is a member, and the influence of the society will be used to prevent him from exchanging or dealing in any way with other entomologists. While these regulations may be difficult to enforce, it is hoped that their influence in preserving rare insects from extermination may be considerable.

THOMAS GRIMES MARRIED. Thomas Grimes, one of the best known engineers on the Duluth, Missabe & Northern railroad, was united in marriage to Miss Sadle McKinnon, of West Superior, at the bride's home Tuesday afternoon. Wess Braden, of Proctorknott, acted as best man and Miss Celia Boushey, of West Superior, as bridesmald. A supper was served hotel, Duluth, in the evening. Mr. and Mrs. Grimes will make their home in Proctorknott.

WEST DULUTH BRIEFS. The Newell house is soon to closed and the proprietor, Ephraim Newell, will remove to Duluth, where he will take charge of a small hotel. Charles Meyers, the young man who decamped a few days ago with the proceeds of a dance given by himself and two others, is said to have made his way safely to Kansas, where he formerly resided. H. C. Block, of Maine Prairie, Minn. who has been in the city for a few days looking after his property interests, returned home today. S. S. Williamson, deputy county treasurer, and superintendent of the Westminster Presbyterian Sunday school, will remove to Duluth in a short time to be nearer the court house. Company H went through the battle exercises in the armory last night, and let forth a series of war whoops that startled the people for blocks around. Her mother told her that her father died three months before she was born, and would never tell her his name. While she was still quite young her mother married one of her countryman named Bartoli Conto, since which time she has led a life of abject misery and serfdom. Two years ago her mother was burned to death as the result of a lamp explosion, and since then she has not even had the little protection which the mother was able to afford her from the brutality of her stepfather.

Conto is quite well to do. He lives in a small log house with his family Maggie slept in the loft of the shanty, where she could plainly see day light through the cracks in the roof, and where she frequently awoke to find little drifts of snow upon her bed. Conto owned twelve cows and it has been this little girl's task to earry two large heavy cans about the village of Biwabik, delivering mllk to customers. There is more catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease, and prescribed local remedies, and by constantly falling to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease, and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheny & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from ten drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials. Address F. J. "We bake 'em fresh every day, sah."

"Then what do you call them English for? Think people haven't got, any sense? You can't get English muffins here in less than a week to save your life and you know it. Darn an institution that serves up snide victuals! Bring me some buck-wheat cakes. There's no mitation about that sort of grub, anyway."

Whereupon the waiter brought him several specimens of the ordinary buck-wheat cake of commerce, which, as every-body knows, hasn't a particle of buck-wheat in it.

BY PREHISTORIC MAY

BY PREHISTORIC MAN.
At the cave of La Mouthe, in the Dordogue, in the south of France, E Riviere has made some curious discoverles during his last excavations. They consist of drawings made by prehistoric man during the stone age on the walls of the cave itself, says the New York Sun. The first one discovered was at a distance of inhety-five metres from the entrance of the cave, and the last one found so far at 147 metres. The animals represented are a sort of ox, a bison, a deer or reindeer with a spotted body, and other animals 329 West Superior St

He said that the land company bought its property for \$400 and \$600 an acre. First there came a small forge employng about fifty men, and lots were sold n a basis of about \$2400 an acre. This orge lasted about a year, and then came the blast furnace. This did not have the effect that the forge did. The ar works came next, and they caused big sale. Additions were necessary and the sale followed the survey. The orice was still about the same. The ron Bay works were next established. and they sold the entire Fifth division. The first day's sale brought in \$145,000 and the company realized about \$500,000 on property that cost \$28,600. Later he Marinette works caused another
